

DX-80 Business Telephone System

Top 31 DX-80 Features

PHONE

Interactive LCD

2x16 Supertwist LCD with 3 softkeys simplifies programming and interaction. Also displays Caller ID data.

30 Programmable Buttons

Configure speed dial, extensions, CO access and more.

Do Not Disturb Mode

Block intercom and CO calls from ringing.

Memo Pad

Store a one-time number for easy dialing.

Call Park

Park and retrieve calls at any extension.

Speakerphone & Headset Jack

Allow handsfree access for busy professionals.

Call Forward

Forward calls by type (external/internal), or use "Follow Me" to redirect calls to the extension where you are currently working.

SYSTEM

Scalable Architecture

Grows from 4x8x4 to 16x48x8.

Meet Me Conferencing

Call into a 4-party conference bridge from anywhere.

Built In Caller ID

Always know who is calling: name and number presented on both digital and analog stations.

Uniform Call Distribution

Run a small call center! Calls forwarded to groups using Linear, Distributed & All Ring modes.

Automatic Fax Detection

KSU does fax detection. No VM required; no costly separate fax line.

SMDR Interface

Track data for incoming and outgoing CO calls. Connects to printer or serial interface.

Door/Gate Control Interface

Operate a contact closure to open a door or gate, or ring a loud bell or other device.

Paging Equipment Interface

Connect to ceiling speakers or horn. Perfect for warehouses and paging.

Automated Attendant Module

Ensure calls are answered when live attendant is not available.

Modem Module

Remote access to the KSU for configuration and maintenance. Reduce response time and service costs.

Tenant Service

One DX-80 can serve multiple businesses while meeting the specific configuration requirements of each.

Programmability

Program using PCDBA, or a digital station.

INTEGRATED VOICEMAIL

Fully Integrated

Consumes no digital or analog station ports.

Automated Attendant

Provides callers with professional greeting, and lists calling options.

Answering Machine Emulation

Listen while a message is left, and optionally pickup or forward the call to another extension.

Call Screening

Callers are prompted for their name. Name is played for subscriber, who can pickup, or let VM answer.

Call Recording

Automatically record all calls, or selectively record at the touch of a button.

Call Queuing

Callers can hold for a extension when busy. System states their position in the queue.

Transfer Off Premise

Ensure calls get through to subscribers when they are away from the office (transfer to mobile, home, etc.).

Caller ID Integration

Caller ID digits available on message playback. Automatically dial caller back at the touch of two keys.

Dial By Name

Navigate subscriber directory alphabetically using last or first names.

Flash and HD Options

7271c Flash VM: 3.2 Hrs., 100 mailboxes.
7270c HD VM: 150 Hrs, 2000 mailboxes.
Both 4 ports, expand to 8.

On Board Modem

Enables remote access for reduced response time and service costs. 7270c only.

Upgradable

Upgrade the 7271c to any Compact Flash size using off-the-shelf components.
